Brown Swiss and Simmenthal cattle

Special animals for milk and meat

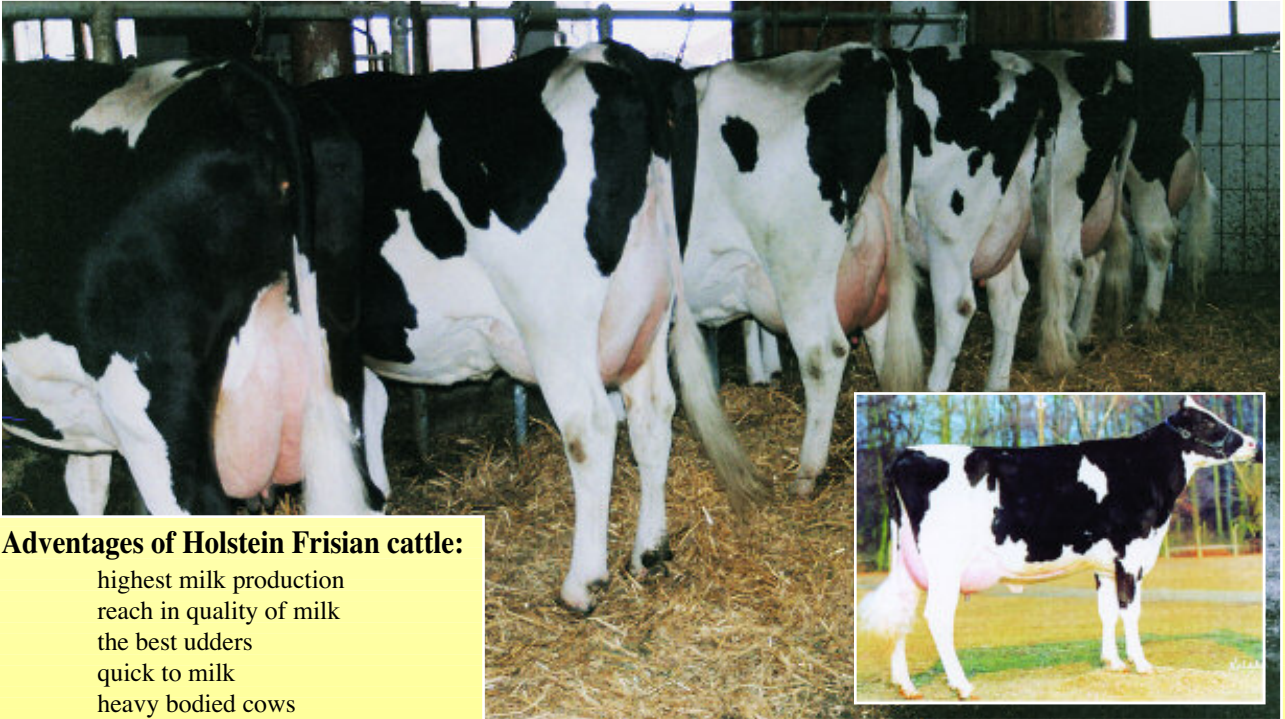

Young fleckvieh calves are very expensive on the europe markets

very good milk production
milk is rich on protein and fat
no problems with mastitis
concentrates are necessary only to a small extent

Holstein Frisian cattle of Austria

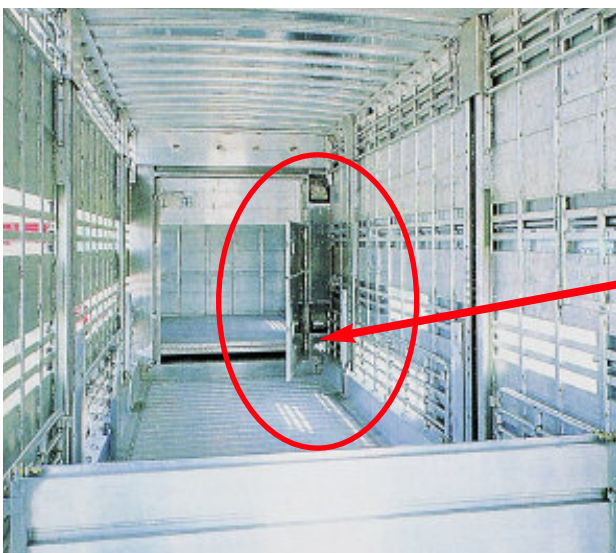

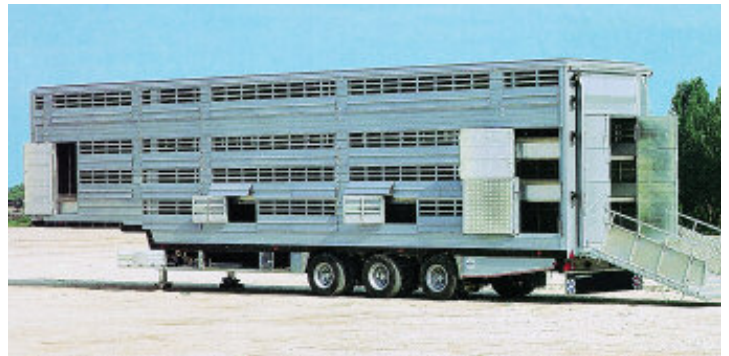

Advantages of Holstein Frisian cattle:

- highest milk production
- reach in quality of milk
- the best udders
- quick to milk
- heavy bodied cows

How we can make transport animal friendly?

We are working with the Transport company:

The experience of our driver team together with the manager of Schwaninger we can give you the guarantee that the animals will arrive punctually, healthy and in best conditions.

The trucks are equipped with ~~an~~ automatic water system. The animals have always enough water to drink. For very big heifers, we have the possibility to change the height of the roof. The floor of the truck is covered with a lot of straw. Hay is also given to the animals during transportation.
